Suggestions

- ① Change the current exit to an entrance to the Round Lake parking lot, change the direction of the parking spots and then make the current entrance to and exit only.
- ② put a raised center line thru the new road that is adjacent to the parking lot entrances and exits to discourage left turns.
- ③ Make a new larger parking lot for the park on Crown Road. →

ADDITIONAL SPACE PROVIDED ON BACK

There is lots of space to do this. Then Make the lower lot
(current lot) an handicapped only lot, or eliminate it.

It is so important to me to preserve the buffer between
the ~~the~~ Round Lake trails & the reminders of daily life —
streets, cars, etc. That is why I voted for option 2.
